Clinical Fellow  
Heart Transplant Service  
Cardiology - Department of Paediatrics

The Hospital for Sick Children is an academic health care, teaching and research centre dedicated exclusively to children and fully affiliated with the University of Toronto.

A one-year position for a clinical fellow on the Heart Transplant Service is available annually in the Division of Cardiology at the Hospital for Sick Children, Toronto. This individual should have background training in either paediatric cardiology or in complex general paediatrics. Experience will be gained in our high-volume institution in the evaluation and management of pre-transplant patients, in peri-operative transplant critical care and in post-transplant medical management, both inpatient and outpatient. Participation with performing biopsies is optional. Our patient population ranges in age from fetal and newborn listings to late adolescents, with a wide array of cardiac diagnoses. Opportunities are available for participation in other general paediatric cardiology activities or to obtain training in clinical transplantation of other organs in the context of a Paediatric Multi-Organ Transplantation program. Research opportunities abound.

Each fellow will be required to provide weekday care plus on-call duty consisting of at most 1 in 4 in-house overnight shifts and 1 in 4 in-house weekend shifts per month as appropriate for level of training.

Interested individuals should submit a letter of application, curriculum vitae, and the names and addresses of three referees to:
